Maya Ben-Ari

Tel Aviv, Israel · maya.benari@example.com · +972 5X-XXX-XXXX · github.com/example

Summary

Front-end developer with just under two years of professional experience building React interfaces for consumer products. Comfortable owning a feature from Figma handoff through to production, and increasingly drawn to the performance and accessibility side of the work. Looking for a team where code review is taken seriously and there is someone more senior to learn from.

Experience

Front-End Developer — Kavana Retail, Tel Aviv · Mar 2025 – present

- Build and maintain the customer-facing storefront in React 18 and TypeScript, serving roughly 40,000 monthly active shoppers.
- Cut the product listing page's Largest Contentful Paint from 4.1s to 1.6s by replacing a client-side filter with a server-rendered one and lazy-loading imagery.
- Introduced Playwright end-to-end tests for the checkout funnel after a pricing bug reached production; the suite has caught four regressions since.
- Pair regularly with the design team to keep a shared component library in Storybook.

Junior Developer (part-time) — Hadar Studio, Ramat Gan · Sep 2024 – Feb 2025

- Delivered marketing sites for six clients using Next.js and Tailwind CSS.
- Wrote the studio's first accessibility checklist after an audit flagged contrast and keyboard-navigation failures across most of the portfolio.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, some Python
Frameworks: React, Next.js, Tailwind CSS, Redux Toolkit, React Query
Testing: Playwright, Vitest, React Testing Library
Tooling: Vite, Git, Figma, Storybook, GitHub Actions, Vercel

Education

B.Sc. Computer Science, The Open University of Israel — 2024. Final project: a browser extension that audits pages for WCAG contrast violations.

Side work

Maintain a small open-source React hook library for form validation (about 300 GitHub stars). Wrote a well-shared blog post on why the studio abandoned CSS-in-JS.

Languages: Hebrew (native), English (fluent), Arabic (conversational)
